Summary

Full-Stack Developer with 4+ years of programming experience and a strong focus on TypeScript-based ecosystems, specializing in Next.js and NestJS. Experienced in designing and shipping production platforms end-to-end — from architecture and API design to database modeling and cloud deployment. Comfortable working independently as the sole developer on a product, as well as collaborating remotely with distributed teams. Currently expanding into Java and backend frameworks such as Spring Boot.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java (Beginner)

Frameworks: Next.js, React, NestJS, Express.js, Node.js, Spring Boot (Beginner)

Architecture: Monorepo (Turborepo), RESTful API Design, Microservices Basics, Component-Driven Development

Databases / ORM: PostgreSQL, MongoDB, Prisma ORM

Cloud / DevOps: AWS (S3, EC2, SES, Lambda, DynamoDB, Amplify), Docker, Nginx, Linux, Git, CI/CD

Messaging: RabbitMQ

Styling: SCSS/SASS, Tailwind CSS

Tooling: Zod, React Hook Form, Yarn Berry, Postman

Professional Experience

Lead Full-Stack Developer | "Heroic.art"

Mar 2025 – Present · Remote (heroic.art)

- Sole developer responsible for the full product lifecycle — architecture, development, deployment and maintenance.
- Built and maintained the platform's frontend with Next.js and Vue 3, and backend with Node.js and Express.js, using PostgreSQL throughout.
- Managed AWS infrastructure (S3, EC2) for hosting, storage and deployment of production services.
- Worked directly with the client to translate business requirements into technical roadmaps and delivery plans.

Full-Stack Developer | Self-Employed

Aug 2024 – Mar 2025 · Remote

- Delivered full-stack web development projects for international clients via Upwork, achieving Top Rated status with a 100% Job Success Score.
- Built full-stack applications and APIs using Next.js, NestJS, TypeScript, PostgreSQL and MongoDB across multiple client domains.

Full-Stack Developer | "Mobius"

Oct 2024 – Dec 2024 · Remote (mobius.az)

- Contributed to an agency's production codebase as part of a remote team while studying full-time.
- Built and integrated RESTful APIs using Node.js and Express.js, with MongoDB as the primary database.
- Developed full-stack features across the React frontend and Node.js backend.

Backend Developer | "BakuDevsGroup"

Sep 2021 – Jan 2022 · Baku, Azerbaijan (Remote)

- Developed backend services for an early-stage startup project using Node.js and Express.js.
- Integrated RESTful APIs to enable data exchange between client and server layers.

Projects

Examination.az — University Exam Preparation Platform | Personal Project (Solo)

2024 – Present · [examination.az](#)

- Designed and built a full-stack exam preparation platform for Azerbaijani university entrance exams, used by real students.
- Architected a Next.js monorepo (Turborepo + Yarn Berry) with separate landing and application sub-domains and a shared UI library.
- Built a NestJS backend with PostgreSQL and Prisma ORM, using RabbitMQ for asynchronous job processing during high-load exam sessions.
- Deployed and maintain the platform on a self-managed Linux VPS with an Nginx reverse proxy, SSL and automated backups.

Education

Azerbaijan State University of Economics (UNEC) — B.Sc. Information Technology | 2023 – 2027 (in progress)

Self-taught programmer since age 15, starting with JavaScript and Discord bot development. Transitioned into professional backend and full-stack development from 2021 onward.
